## GREEN LIGHT COMPANY INTRODUCES NEW FORMULATION CRABGRASS PREVENTER<sub>2</sub> WITH DIMENSION<sup>®</sup> FOR PRE-EMERGENT WEED CONTROL

**San Antonio, TX** – August 1, 2004 – Green Light Company has announced the introduction of a new formulation of **Green Light Crabgrass Preventer<sub>2</sub>**, a pre-emergence granular herbicide containing Dimension<sup>®</sup>.

**Green Light Crabgrass Preventer<sub>2</sub>** provides pre-emergence control of crabgrass in warm- and cool-season turf. The granular formulation effectively controls grasses and broadleaf weeds such as barley, barnyardgrass, bluegrass, carpetgrass, chickweed, goosegrass, foxtail, henbit, oxalis, purslane, ryegrass, sandbur, and many others. **Green Light Crabgrass Preventer<sub>2</sub>** can be applied up to four weeks later than other crabgrass preventers. In addition, this product provides **post**-emergence control of seedling crabgrass after germination and

emergence.

**Green Light Crabgrass Preventer<sub>2</sub>** prevents Dallisgrass, one of the few pre-emergent products that can make this claim.

Once the product is activated with rainfall or irrigation, **Green Light Crabgrass Preventer<sub>2</sub>** forms a barrier in the weed seed germination zone that keeps working for up to four months, depending on the rate. Shallow cultivation will not reduce its effectiveness.

For information on **Green Light Crabgrass Preventer<sub>2</sub>**, as well as the entire line of Green Light products, contact the Green Light Company, P.O. Box 17985, San Antonio, Texas 78217-0985, or visit our website, [www.greenlightco.com](http://www.greenlightco.com).

**Green Light Crabgrass Preventer<sub>2</sub>** is available in a 10 lb. bag.

Green Light is a 100% employee-owned company. Electronic images are available upon request.
