GREEN LIGHT INTRODUCES FRUIT TREE SPRAY

San Antonio, TX - January 1, 2005 – **Green Light Fruit Tree Spray** is now available from Green Light.

Fruit Tree Spray is a broad-spectrum insecticide, fungicide, and miticide for control of insects, diseases, and mites on fruits, nuts, trees, and ornamentals. One pint of **Fruit Tree Spray** will make up to 16 gallons of finished spray and may be used up until the day of harvest.

Green Light Fruit Tree Spray contains extract from Neem tree seeds and pyrethrins. It provides the immediate “knock down” of targeted insect pests, as well as controlling diseases on a wide variety of edible crops. As an insecticide/miticide, **Fruit Tree Spray** works on contact and also repels insects. As a fungicide, **Fruit Tree Spray** works primarily as a protectant to prevent infection of the plant tissue. It will also kill fungi by contact on the leaf surface.

Apply **Fruit Tree Spray** for control of aphids, armyworms, beetles, leafminers, leafrollers, loopers, mealybugs, scales, spider mites, tent caterpillars, thrips, webworms, whiteflies, and other insect pests. **Fruit Tree Spray** is labeled for use on almonds, apples, berries, citrus, melons, peaches, pears, pecans, plums, walnuts, and other edible crops.

Green Light Fruit Tree Spray is available in pint size.

For more information on Green Light **Fruit Tree Spray**, as well as the entire line of Green Light products, contact the Green Light Company, P.O. Box 17985, San Antonio, Texas 78217-0985, or visit our website at www.greenlightco.com.
