## GREEN LIGHT INTRODUCES LAWN & GARDEN SPINOSAD® CONCENTRATE AND RTS

**San Antonio, TX - January 1, 2005 – Green Light has introduced *Lawn & Garden Spray with Spinosad®* for the home and garden market.**

***Green Light Lawn & Garden Spray with Spinosad®***, kills insects, and may be used on vegetables, fruits, and nuts. The active ingredient in this unique, patented formulation is a fermentation-derived insect control product intended for control of worms (caterpillars) and other insect pests. ***Spinosad®*** does not significantly impact beneficial insects, while controlling target pests by ingestion and contact activity. Susceptible insect pests may be observed on plants up to several hours after treatment, but they will have ceased active feeding before dying. ***Spinosad®*** is also recommended for fire ant control; by combining mound and broadcast applications it eradicates visible mounds while preventing new ones from forming.

***Spinosad®*** has no odor, is water-based, and kills targeted insects within hours. ***Spinosad®*** is non-staining and labeled for use in vegetable gardens.

***Green Light Lawn & Garden Spray with Spinosad®*** is available in pint concentrate and quart ready-to-spray.

For more information on Green Light ***Lawn & Garden Spray with Spinosad®***, as well as the entire line of Green Light products, contact the Green Light Company, P.O. Box 17985, San Antonio, Texas 78217-0985, or visit our website at
