GREEN LIGHT INTRODUCES YARDSAFE INSECT REPELLENT GRANULES

San Antonio, TX - January 1, 2005 – **Green Light** has added another exciting new product to their growing line of organics – **YardSafe Insect Repellent Granules**.

Green Light YardSafe Insect Repellent Granules contain cedar oil, are chemical free, 100% natural, and safe around children and pets. An alternative to conventional pesticides, **YardSafe Granules** have a pleasant cedar scent and are long-lasting.

YardSafe Granules can be used around shrubbery, flowerbeds, vegetable gardens, and on lawns. The refreshing scent of **YardSafe Granules** will repel ants, beetles, chiggers, chinch bugs, crickets, fleas, flies, gnats, roaches, scorpions, slugs, snails, termites, and numerous other pests. **YardSafe Granules** are designed to repel or impair the mental faculties of insect intruders.

Green Light YardSafe Insect Repellent Granules feature **EcoGranules**[®], an organic carrier which combines reliable performance and quality with environmental responsibility. The layered, onion-like structure consists of a cellulose fiber core surrounded by multiple coating layers, enabling a biodegradable organic delivery system of superior absorption. The fine fibers in the core of the **EcoGranule**[®] are recycled from fine industrial wood dust or other fine cellulose material.

Green Light YardSafe Insect Repellent Granules are available in a 10 lb. bag.

For more information on **Green Light YardSafe Insect Repellent Granules**, as well as the entire line of Green Light products, contact the Green Light Company, P.O. Box 17985, San Antonio, Texas 78217-0985, or visit our website at www.greenlightco.com.

Green Light is a 100% employee-owned company. Electronic images are available upon request.
